### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 06 March 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**ULTRA SHORT HIGH PRESSURE GRADIENT FLOW PATH FLOW FIELD**

Examiner: Yuan

S.N. 10/758,816

Art Unit: 1745

April 23, 2007

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 6, 2007 has been entered. Claims 1,3,5,6 9 were amended.

2. The text of those sections of Title 35, U.S.C. code not included in this action can be found in the prior Office Action issued on May 11, 2006.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. The term "ultra short flow path" in claim 1 is a relative term which render the claims indefinite. The term "ultra short" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

***Claim Rejections - 35 USC § 102***

6. The claim rejections under 35 U.S.C. 102(e) as anticipated by Morse et al. on claims 1-9 are withdrawn, because the independent claim 1 has been amended.

***Allowable Subject Matter***

7. Claims 1-9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims. Claims 1-9 would be allowable because the prior art does not disclose or suggest a fuel cell comprising a first planar manifold defined between a first gas-impermeable element and an active element, a plurality of spacers disposed within the first planar manifold, each of the plurality of the spacers and the first gas-impermeable element having an orifice formed therethrough, a second planar manifold defined between the first gas-impermeable element and a second gas-impermeable element in a subjacent relationship to the first planar manifold, wherein a flow path is established from the second planar manifold through the orifice over the active to the first planar manifold. The closest prior art of record, Moore et al., does not teach a first planar manifold defined between a first gas-impermeable element and

Art Unit: 1745

an active element, a second planar manifold defined between the first gas-impermeable element and a second gas-impermeable element in a subjacent relationship to the first planar manifold as stated in the claim.
